

# MOREHEAD PHOTOGRAPHY

## Becky Anderson & Jeff Morehead

Although our advertising agency consumes much of our time, love of nature inspires us to don hiking boots to explore and capture the raw beauty around us. Whether in our photo studio or on a mountain trail in the middle of a downpour, we combine our talents of artistic design and composition on each shoot. In the fashion of Currier & Ives, we shoot, select, style and design prints as a team.

As part of Morehead Marketing, our advertising, design and photography firm, we own a commercial photo studio near Parkersburg, WV which specializes in product, styled food, room set, architectural, model, tourism, landscape and fine art photography. Our images have been published worldwide through ads, promotions and magazines such as *Woodcraft Magazine*, *Wonderful West Virginia*, *Ohio Magazine*, *West Virginia Medical Journal*, *Early American Life*, *Columbus Monthly*, *Cleveland Magazine*, and *West Virginia Living*.

## Print & Framing Quality

Each giclée is Raster Image Processed on premium luster paper with wide color gamut inks which we both hand sign. Color is spectrophotometer certified to match G7 international printing quality. Archival materials surround every print: backing board, double mats, protection either by clear sleeves or framed (solid oak painted black or honey stained) with conservation glass to block 99% UV light. Standard mat sizes are 18"x24" and 22"x30" with other sizes also available.

*West Virginia's state shape hides as a leaf among rocks. Ohio's shape resides on a buggy's fender. South Carolina's state shape floats hidden among clouds. Each print has a subtly hidden state to be found.*

## Find The Hidden State In Each Print

Photography tells a story and that story is different for everyone who views it. Our scenic prints engage people. Not only do they bring back memories of places loved and locales to dream about, but hidden in each print is the state's shape where photographed and viewers love to spend time trying to find its secret location.

## Fine Art Prints & Digital Paintings

Whether shooting in the mountainous terrain of our native West Virginia, the beaches and salt marshes of South Carolina's Lowcountry or a winding back road in Ohio's Amish Country, we strive to capture the beauty of our surroundings with a fresh eye. We also blend our talents for photography, illustration, and graphic design to create beautiful digital paintings. These prints include one or more photos blended together with the addition of painterly brush techniques to create unique works of art.
